

Meraki MX WAN Configuration: Static IP Setup

NSO Field Reference — Cisco Meraki MX Firewall

WAN 1 Configuration (Primary)

For Modem/Router — Switch DHCP to Auto

- Go into IPv4 Config and select Manual.
- Enter the provided Static IP address from ISP documentation.
- Enter Subnet Mask, Gateway, Primary DNS, and Secondary DNS as provided by ISP.

WAN 2 Configuration (Backup)

Switch DHCP to Manual

- Add the Static IP address from ISP documentation.
- Subnet ends with .0 (e.g. 192.168.1.0)
- Gateway is the same as the static IP but ends with .1 (e.g. 192.168.1.1)
- Primary DNS: 8.8.8.8
- Secondary DNS: 8.8.4.4
