

Security Awareness Training

Corporate Question Bank — 5 Domain Coverage

This document organizes and tracks research for security awareness training questions for corporate office staff. Coverage spans five key security domains with scenario-based questions and supporting research notes.

1. Phishing & Social Engineering

Sample Question:

Scenario: You receive an email from what appears to be Google Workspace support stating your account has been compromised and you need to click a link to verify. What should you do?

Research Notes:

- Consider questions about SMS phishing (smishing) and voice phishing (vishing).
- Explore scenarios related to impersonation of colleagues or vendors.
- Test ability to identify red flags in suspicious communications.

2. Password Security

Sample Question:

What is the recommended minimum length for a strong password?

Research Notes:

- Cover current best practices for password complexity and length.
- Include questions about password managers and MFA.
- Scenarios involving password sharing or writing passwords down.

3. Data Security & Handling

Sample Question:

Where should sensitive corporate information (financial data, employee records) be stored?

Research Notes:

- Cover company policies on data storage and handling.
- Include questions about data encryption.
- Scenarios involving accidental data leaks or unauthorized access.

4. Physical Security

Sample Question:

You notice an unfamiliar person without a visitor badge wandering around the office. What is the appropriate action?

Research Notes:

- Cover visitor management policies.
- Scenarios involving tailgating or unauthorized entry.
- Questions on securing workspaces and reporting suspicious activity.

5. Google Workspace

Sample Question:

You receive an email in Google Workspace from an unknown sender with a Google Docs link. What should you do before clicking?

Research Notes:

- Cover common security threats targeting Google Workspace.
- Scenarios involving shared access to Google Drive.
- Questions related to reporting suspicious activity within the platform.
